

CAM SWITCHES JZE WITH EUROLOCK LOCK

We present the innovative cam switches JZE with EUROLOCK lock, ranging from 6 to 40 A.

- This switch expands the range of existing JZ switches with FAB locks and fully replaces this series.
- The EUROLOCK lock meets all the requirements of our clients and, thanks to greater availability and easy installation, can provide the same quality as FAB locks at a more favorable price. We also offer cam switches of the new JZE series with the "master key" option.

S 6,10 JZE

S 16, 25 JZE
